2 x 5l	K.2.I-P.NZ.5000.UK	£52.85

Tersano Lotus Pro System

The Lotus Pro is ideal for commercial use, producing many litres of SAO at the press of a button. Simply switch on, wait for the light to go green and start filling! SAO can be used to fill buckets, spray bottles, steamers, scrubber dryers and most other cleaning equipment.

Aqueous ozone is a powerful oxidizer proven to clean effectively, destroying a host of germs, bacteria, and other contaminants on surfaces, which helps to deodorize and sanitize.

SAO looks, feels and smells like ordinary tap water but tap water around the world contains varying types and amounts of minerals in the water. These minerals affect the performance of aqueous ozone.

Our cartridge adjusts the minerals in the water, stabilizing the tap water so that regardless of where in the world your tap water originates from, it is consistent and maximized for cleaning and sanitizing performance.

SAO has been certified safe by the top regulatory bodies around the world and is safe for use in the most sensitive environments. From governmental bodies to independent test laboratories and sustainability organizations, stabilized aqueous ozone is a safe, sustainable alternative to traditional chemical cleaners and sanitizers.

i-clean mini

With the press of a button, the iClean mini™'s diamond coated, and electrodes instantly create an oxidizing solution that is safe for people – yet tough on dirt, germs and odours. It can be used on numerous surfaces in all areas of transport from door handles to windows. It replaces all-purpose cleaners, glass cleaners and so much more.

It is very small and simple to use for a complex and effective product.

LQFC200	£249.00

--------	------

i-cover

A battery powered cold spray mist generator designed to make disinfecting jobs fast, efficient, and thorough. Its unique coloured coded nozzle system makes it easy to use on different surfaces.

A wide spray fan is used to generate faster cleaning and makes it more effective with the use of less liquid. It is ergonomically designed for easy use and better control through its 4-way usability – by hand, shoulder, back or trolley.

Without batteries	IM10.FCT.0000B	£783.58
With batteries	IM10.FCT.1115B	£1150.25

i-mop Lite

i-mop lite is a scrubber dryer with the flexibility of a mop. It is the smallest and lightest machine available in the i-mop range. It is a tool with outstanding manoeuvrability to deal with tight corners such as those in seating areas on transport. The easy portability makes it perfect for mobility and off-site cleaning as it fits in the trunk of the car and has transport wheels.

Its powerful twin counter-rotating 500 RPM brushes for soil removal proven by ATP test data reflecting up to 90% cleaner surfaces.

IMOP LITE	£2,605.00
-----------	-----------

i-mop XL Plus

i-mop XL is a full-size scrubber dryer with the flexibility of a flat mop. The i-mop features a high-speed twin brush scrubber drier deck with a working area of 46 cm (18 inches), with unmatched agility. The two counter rotating brushes give a smooth experience and allows control of the machine even with one hand. Its flexibility means it is possible clean around and underneath objects.

The i-mop allows a quick change in chemical by simply changing to a different solution tank and proceed to fill, refill and empty the machine easily.

IMOPXL	£3,199.00
--------	-----------

i-mop XXL

The i-mop XXL is a full-size scrubber dryer that comes with a larger scrub deck & new power management system. This innovation allows the user to clean up to 2300 m² in just an hour, changing how a larger auto scrubber should look, feel & handle. It can save time and cut down time on logistics in larger environments. The i-mop XXL can save approximately 20% of time compared to conventional walk-behind auto scrubber with a size of 50 to 75cm.

IMOPXXL	£4,299.00
---------	-----------

Radic8 Viruskiller

The Virus Killer provides a total indoor air quality solution. Creates clean purified air, free from smoke, pollen, dander, odours, fungi, mould, mildew, fine dust, toxic gases (VOC's), bacteria and viruses

Complex filtration system comprising washable pre-filter, thick HEPA filter, medium filter and activated carbon filter to combat allergens, dust and dander.

Photo-catalytic oxidative (PCO) nano-technology. Multiple UV-C Lamps and titanium dioxide (TiO2) coated plates produce 'super oxidant' hydroxyl radicals, to neutralise 99.9999% of viruses and bacteria

VKB002	£1,575.00
VK002	£1,575.00

i-air Pro

The unique i-air is the only stand alone unit on the market that delivers MERV19 class air to medium to large spaces in all segments. Suitable for use in fitness clubs and sport venues, office spaces, hospitals and clinics, education facilities, hotels and restaurants. The i-air delivers the best air you can breathe indoors.

Also available to rent.
