

## ***VS-500 Ultra Low Volume Fogger***

Use the VS-500 for disinfection, pest control, odour control and plant protection.

The VS-500 works by expelling a fine, almost invisible mist into the atmosphere which eventually settles on all surfaces including those impossible to reach by conventional methods.

The machine is compact, and robust, making it ideal for constant commercial use, whilst equally suited to an office or domestic environment. The large 5 litre tank and powerful 1400w 230v electric motor allow the covering of larger areas with ease.

Whilst comfortable as a hand held fogger the VS-500 can be positioned on the floor or counter-top. The cone is height adjustable allowing it the fog to be directed for best effect.

Setting the flow rate control at level 2 will produce a dry fog, suitable for areas such as offices or where textiles or other sensitive materials / merchandise are exposed.

The ability to adjust the fogger output from 9 µm up to a fog 49 µm, and flow rate up to 49 litres per hour makes this machine suitable for the application of disinfectants, biocides, fungicides and pesticides.

Regular fogging with an approved disinfectant such a Virosol as will help prevent the cross-infection of viruses such as MRSA, COVID 19 Coronavirus (human and feline), Strangles, Ringworm and many more.

### **SPECIFICATIONS**

Motor	1400w, 220v AC, 50hz
Tank Capacity	5 Litre
Output Flow Rate	0-49 l/h
Droplet Size	9-49 micron
Empty Weight	5.3 kg
Dimensions	50 x 17 x 50 Cm

## ***Virosol Disinfectant & Cleaner***

- **Kills Viruses, Fungi and Bacteria**
- **Safe for Health & Public Utility Sectors**
- **Safe for Fogging and Spraying**
- **Non Toxic**
- **Non Staining**
- **Non Irritant**
- **No need to rinse**
- **Can be used as a cleaner**

Virosmart™ Virosol Disinfectant Concentrate 5 Litre is a high-quality disinfectant and cleaner that is chosen by hospitals, veterinary surgeons, top breeders and animal sanctuaries, and other high sensitivity areas.

### Why chose Virosol

Most people choose this disinfectant because it is fully tested, it is entirely non-toxic, with a PH of 7.6, so there is no need to rinse away with water. It does not contain harmful Phenols, Aldehydes or Alcohol. This product is safe to use on all surfaces as it is entirely non-staining, non-tainting, and non-irritant. Also being water based and biodegradable it is kind to the environment.

### How to use

This large bottle of concentrate can be diluted to fill smaller bottles or fogging machines. We recommend an 1:50 dilution to ensure maximum effectiveness, which means each 5ltr bottle is 255ltr of disinfectant. No need to rinse after application.

### COVID-19

This product has been proven effective against COVID-19 at a dilution of 1:50 and a surface contact time of 5 minutes. For maximum effectiveness use with a fogging machine to ensure all surfaces are reached.
